```java
import org.springframework.beans.factory.annotation.Autowired;
import org.springframework.stereotype.Service;

@Service
public class AdminService {

    @Autowired
    private MallRepository mallRepository;

    public Mall createMall(Mall mall) {
        // Logic to create a new mall
        return mallRepository.save(mall);
    }

    public Mall updateMall(Mall mall) {
        // Logic to update an existing mall
        return mallRepository.save(mall);
    }

    public void deleteMall(Long mallId) {
        // Logic to delete a mall
        mallRepository.deleteById(mallId);
    }

    // Additional methods for managing mall-related operations like adding/removing stores,
managing employees, etc.
}
```
